Email: mageshb4006@gmail.com | Phone: [8870384006](tel:8870384006) | Location: Bangalore, India

PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of self-directed learning and 4 deployed web applications, including 3 React.js projects. Proficient in REST API integration, Redux Toolkit state management, and responsive UI design (320px–1440px). Completed Java FullStack certification (Besant Technologies, 2025) and 2 FreeCodeCamp certifications. Seeking a React Developer / Frontend Developer role to build clean, performant, and accessible UIs.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks: React.js, Next.js, Tailwind CSS, Bootstrap 5

Libraries: Redux Toolkit, React Query, Axios, React Router DOM

Tools: Git, GitHub, VS Code, Figma, Chrome DevTools, Webpack, Vite

Deployment Platforms: Vercel, Netlify

Testing: Jest (basic), Cross-browser compatibility, React Testing Library (basic)

Concepts: REST APIs, API integration, State Management, Responsive Design, Web Accessibility (WCAG), Component Architecture, Agile/Scrum

PROJECT EXPERIENCE

SuperCart E-Commerce Platform

Tech: React.js, Tailwind CSS, JavaScript ES6+, REST API

- Developed a fully responsive e-commerce platform with product listing, category filtering, search, and cart management features.
- Built reusable React components and optimized frontend rendering using React hooks for better performance and scalability.
- Implemented dynamic state management, loading states, responsive layouts, and smooth user interactions across devices.

SpendLens | Expense Tracker Web App

Tech: React.js, Tailwind CSS, REST API, JavaScript ES6+

- Built a fully responsive expense tracker (320px–1440px) with REST API integration for auth, transactions, and real-time dashboards using React Query.
- Improved performance by ~25% via lazy loading, memoization, and optimized rendering; built 8+ reusable components improving scalability.
- Implemented form validation, error handling, and loading states for a seamless user experience across devices.

EXPERIENCE

Frontend Developer — Personal Projects | Bangalore

Jan 2025 – Present

- Developed and deployed multiple React.js applications including an expense tracker, portfolio website, and task manager.
- Implemented REST API integration, authentication, and responsive UI design across projects.
- Improved application performance and user experience through optimized component structure and efficient state management.

TOM Operator (Non-IT) | Metro Train Operations, Bangalore

2023 – 2024

- Monitored and coordinated metro train operations to ensure smooth scheduling and passenger flow.
- Maintained accurate logs and ensured adherence to safety and operational procedures.

EDUCATION

B.Sc Computer Science 2016 – 2019

Thiruvalluvar University, Tamil Nadu

CERTIFICATIONS

- Java FullStack Certification — Besant Technologies, Bangalore (2025).
